Betreff: RE: Tinnitool

Hi Jimmy - apologies for the delay in replying back, I had a problem with my modem. It's finally got sorted.

With regard tinnitool I've personally had a lot of relief. I do know the tinntool company does provide the device on a rental basis. I have copied this email to both the UK distributor and the main company based in Germany. I also have a lot of relief from the 'Sleep' CD which I use every so often to help me to get to sleep.

Every so often I go through this episode where I get extreme ear pain, with the use of tinnitool I get immediate pain relief.

I hope either the main company in Germany or the UK distributor will assist you with the tinnitool if you wish to have it on a rental basis.

Keep in touch and please let me know how you get on. I will soon send you another email containing an indepth analysis of how I control my tinnitus which I hope will also assist you in your condition.

Take care & good luck with the tinntool.

Rgds
Kate

Subject: Tinnitool

Is the device still working, I am in the U.S. and it's not available here yet, but if it works I am going to try to find a way to get one. Thanks Jimmy
